Abstract

This research aims to examine the influence of corporate social responsibility disclosure, leverage, sales growth, and industry type on firm's profitability which was measured by return on asset (ROA). The population in this research are manufacturing companies listed in Indonesia Stock Exchange period 2013 – 2016. This is a quantitative research which the data are analyzed by using panel data regression method. The result of this research show that corporate social responsibility disclosure (CSR), leverage, sales growth, and industry type have a positive and significant effect on return on asset (ROA).
